

Repy Board ®

Manufactured by OOHASHI Co., Ltd., Japan

Advantages

1. Rugged and durable
2. Lightweight
3. Long service life
4. Eco-friendly

1,230mm(H) x 2,200mm(L) x 13mm (Thick)
Weighing 34 +/- 2 Kgs

Repy Board ®; Eco-friendly product

Repy Board® is a road protection plate made of **100% recycled polyethylene** recovered from discarded electric cables

Production Process

Raw Material
(Discarded electric
cables)

Shredding cables to small
particles, and separating
polyethylene particles

Kneading molten polyethylene,
and pressing to the specified
measurements

Repy-Board Pavement

Repy-Board® Pavement is the practical solution for **pavement of agricultural roads in developing countries**

Advantages of Repy-Board Pavement

1. Rugged and Durable: Supports safe driving of vehicles weighing up to 80MT
2. Lightweight: Easy to carry and install by hand, requiring no heavy equipment
3. Long Service Life: Excellent resistance to harsh weather and UV rays ensures maintenance-free service for 30+ years
