# [Problems Facing our Customers, their Needs, and our Solutions: Overview \*Pattern (1)]

## Overview

Problems facing our customers and their needs	Our solutions	Scenes where our solutions are used
<p>1</p> <p>When disaster stops operations of infrastructures (When flush toilets cannot be used)</p>	 <p>Remove germs and eliminate bad odor by using tablets of "Mt. Fuji Toilet," special defecation treatment tablets</p>	<p>How to use</p>  <p>Put the tablets in the plastic bag before use of the toilet.</p>  <p>Bind the plastic bag after use of the toilet and dispose of the bag.</p>
<p>2</p> <p>For rescue parties working in the event of disaster; at the time of outdoor activities and driving</p>	 <p>Usable in any place as it includes the poncho for users' privacy.</p>	   <p>Set up the paper box with the plastic sheet over the top. Place the tablets in the bottom. Use the poncho while using the toilet. Please make sure to bind the bag. The tablets will eliminate odor and harden the waste.</p>
<p>3</p> <p>Also usable as a temporary toilet without using electricity or scooping up human waste</p>	 <p>Setting tablets of "Mt. Fuji Toilet" in a temporary toilet box, you can use it as an odor-free temporary toilet with no need of electricity or scooping up human waste.</p>	  <p>Once processed, the waste becomes odor-free and recyclable as a material for greening materials used in deserts. It is also possible to be resolved in soil. Therefore, no waste will be newly generated.</p>

# [Problems Facing our Customers, their Needs, and our Solutions (Products)]

## Problems Facing our Customers, their Needs, and our Solutions

### Problems Facing our Customers and their Needs

- When flush toilets cannot be used in the event of emergencies
- Where no sewer infrastructures are built
- When you want to go to the toilet suddenly during mountain climbing or driving

### Our Solutions

- Tablets of "Mt. Fuji Toilet"
  - Our special defecation treatment tablets can be used at a toilet cut from any water supply. Placing the tablets in a temporary toilet, you can use the toilet immediately.

- At the time of earthquake disaster, water and sewage systems become broken, and supply of electricity stops, causing pumps to stop their operation. As a result, we will not be able to use flush toilets. This will also be true at the time of water disasters caused by typhoons and tsunami.

- In most developing countries, people use holes they simply dig as toilets in rural villages and tourist destinations. This situation is posing hygienic and environmental problems.
