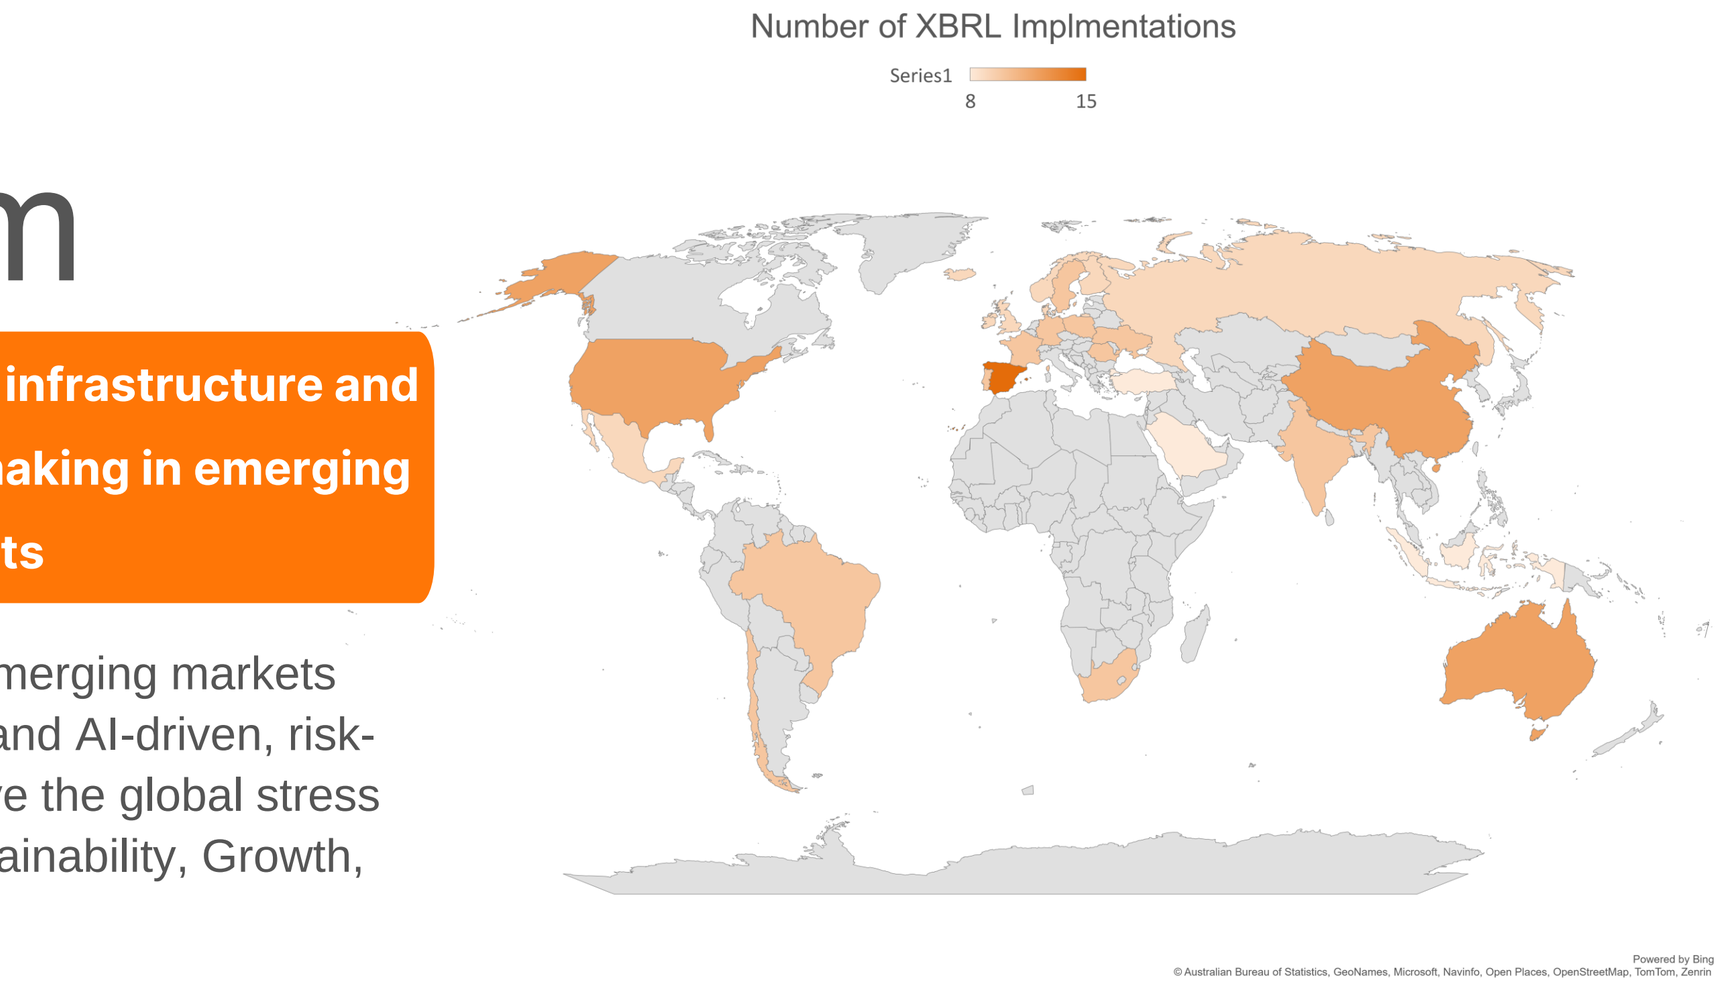
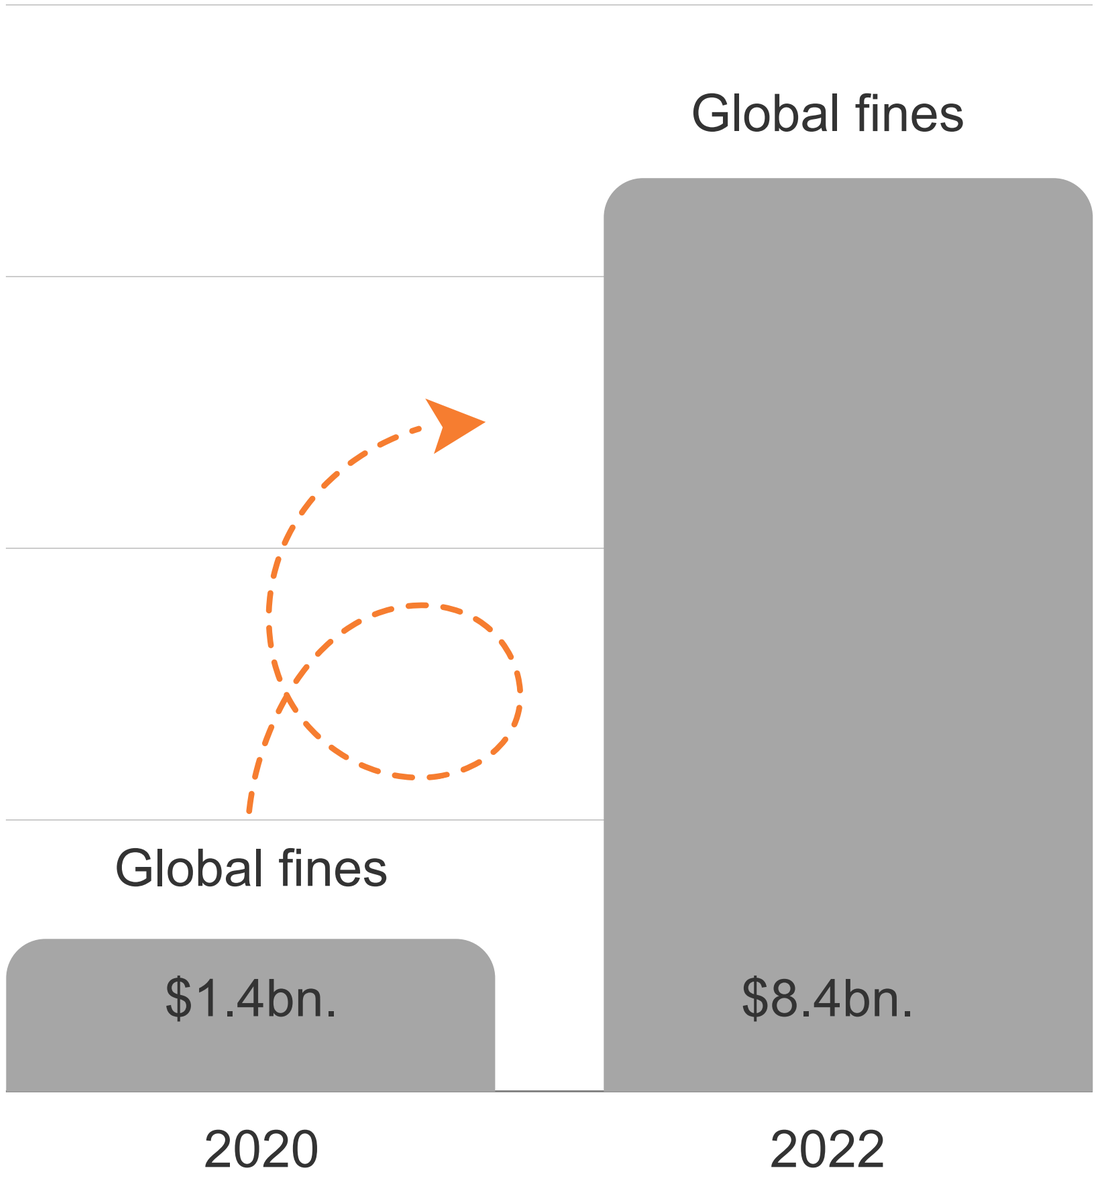
Problem

Lack of data exchange infrastructure and data driven decision making in emerging markets

Financial institutions in emerging markets lacks the needed DATA and AI-driven, risk-aware decisions to survive the global stress and drive resilience, sustainability, Growth, and competitiveness.



Over the past few years, fines imposed by regulatory agencies around the world have nearly quadrupled.



Pianat.ai

Our flagship

Following World Bank Ref. architecture

WORLD BANK GROUP

Reg-Tech

Pi-DCC

Decision Command Center

For reporting entities:

Digital submission experience creating the data-driven ESG & GRC proactiveness.

Two-Sided Platform

Sup-Tech

For Gov Supervisory Authority:

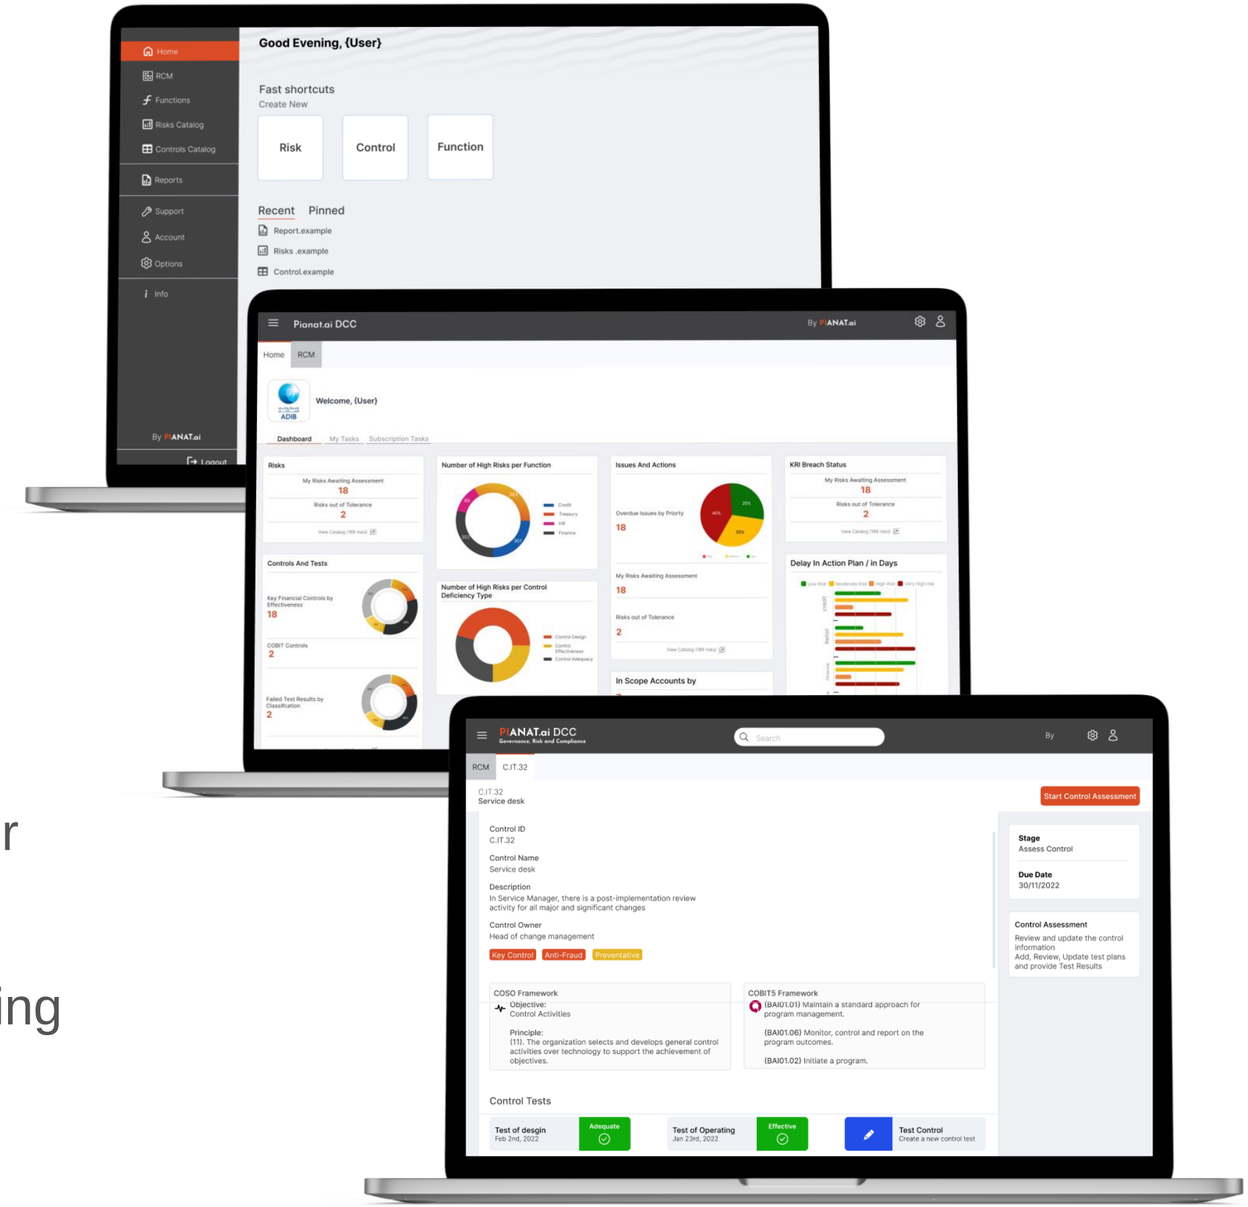
Develop, Maintain & and operate data collection tools for all financial and non-financial reporting

Pianat.ai

Pianat.ai(DCC)

Decision Command Center

Make life easier by implementing ESGRC in an integrated and federated manner, aligned with business processes, risk management, audits, reporting and strategic objectives to Drive greater efficiency and growth with one automated, user-friendly shared ESGRC management and reporting platform.



Pianat.ai

DCC (Decision Command center) ESGRC

Targeting a growing area of need for compliance, governance and risk (automated) management instead of ad-hoc and firefighting, or one man show hero models currently existing.

The platform is modular and is built on a fit-to-purpose concept to cover multiple use cases including:
