

Company Brief Introduction

FF Steel is a leading steel mill in Pakistan in terms of production capacity and rolling speed. Since its foundation in 1986, the company has excelled in the manufacturing of steel products by meeting International Standards. FF Steel takes pride not only in their technical superiority over other re-rolling mills, but also in their quality assurance procedures and processes.' After the devastating earthquake of 2005, FF Steel decided to produce only the highest standard Grade 60 Steel bars, making FF Steel Pakistan's only manufacturer to exclusively produce Grade 60 steel bars. FF Steel has its own raw material (billets) and has their own in-house material testing facility to ensure highest quality production.

It has an extensive network across the country with its Head office in Peshawar and two Steel plants situated in Lahore & Peshawar. The company has a daily production capacity of 1,100 Tons with 400 Tons production capacity of Peshawar plant and 700 Tons production capacity of Lahore plant. After an expected IPO in 2021 and erecting a third Steel manufacturing unit in Karachi, FF Steel will become the largest steel manufacturer in Pakistan.
