Free

Japanese Ultrasound device
LEQUIO
USB Probe US-304

- High quality and reliable ultrasound device**
Advanced anti-interference capability to support high image fidelity and software with high reliability.
- User Friendly device**
Minimal learning curve. Intuitive controls and simple operation.
- Wide range of application**
Ideal for 1-7kg growth of weight for ultrasound probe or light and easy to carry and use.
Ideal for obstetric examination. 1.0MHz. 2.5MHz. 3.5MHz. 5.0MHz. 7.0MHz. 8.0MHz. 10.0MHz.
Specialized probe for cardiac, vascular, T or M-mode, B-mode etc.
Specialized probe for breast, obstetric, etc.
Specialized probe for vascular, etc.
- Competitive Price**
 - Cost of each unit is quarter of conventional ultrasound probe in the market.
 - Highly portable and lightweight design. Ideal for field use and emergency use.
 - Highly reliable and durable. Long service life. Ideal for field use and emergency use.

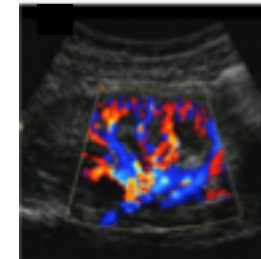

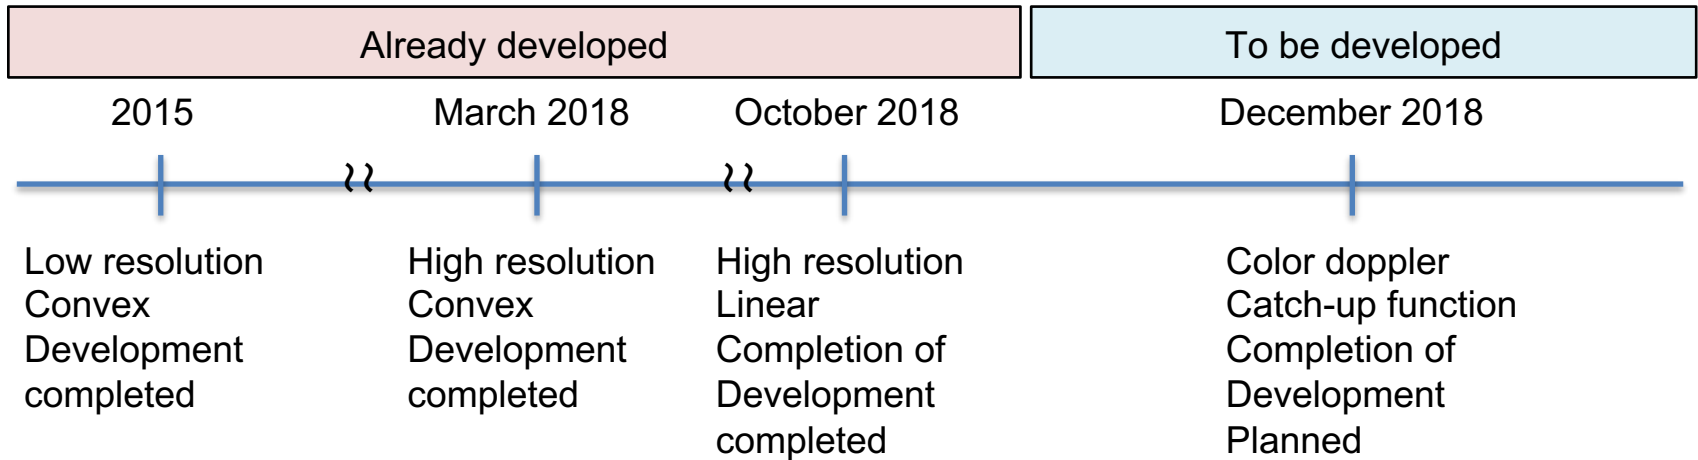

Sufficient
resolution in
primary
healthcare

Easy!
Simple function

Product portfolio

Products developed or to be developed by Lequio Power Technology

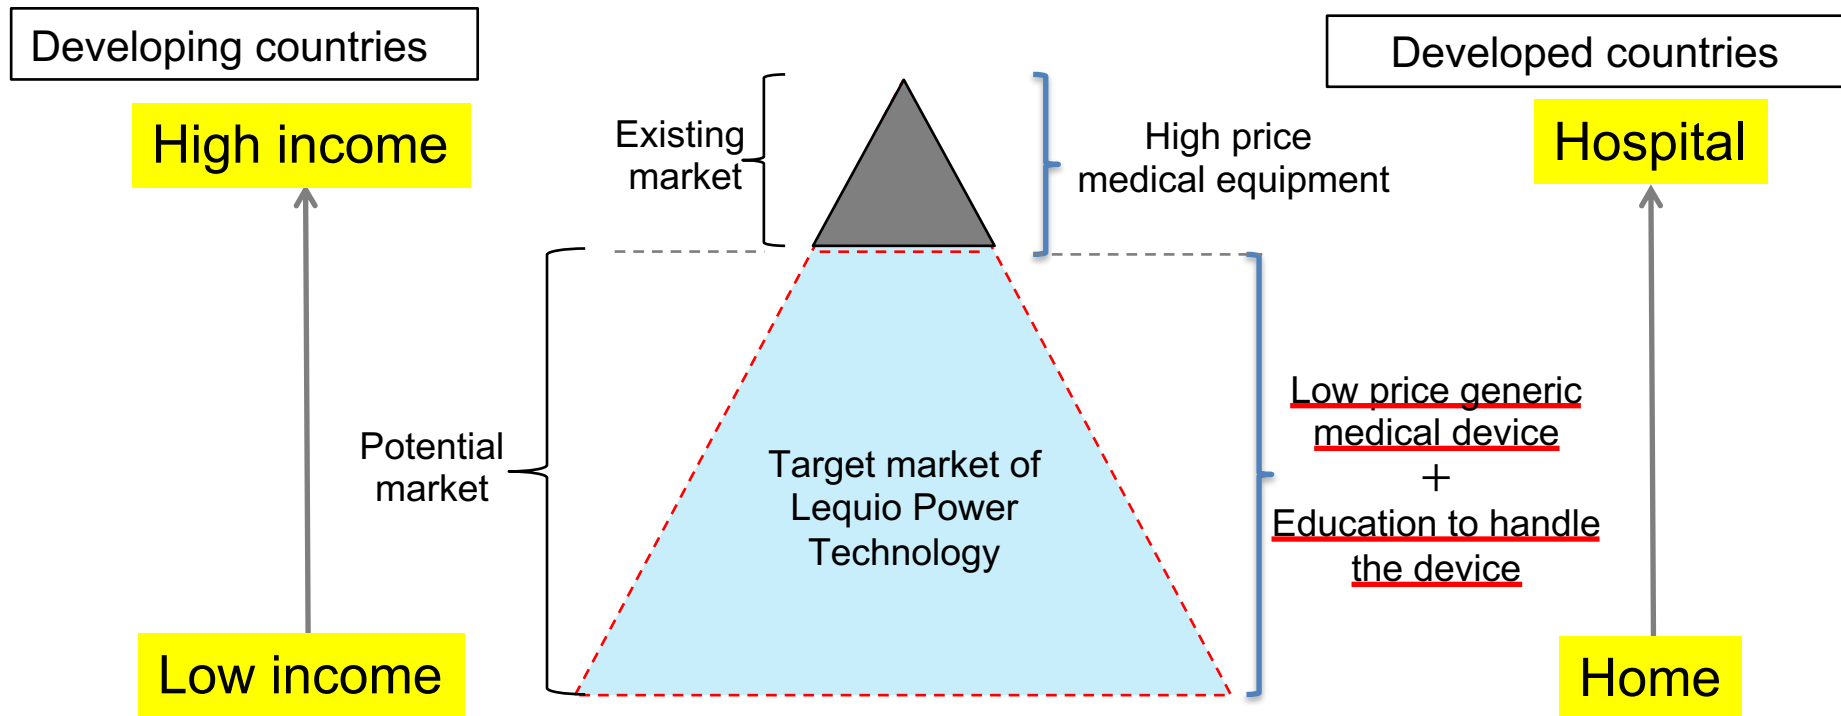

Negotiating with more than 50 countries to put distributors around the world

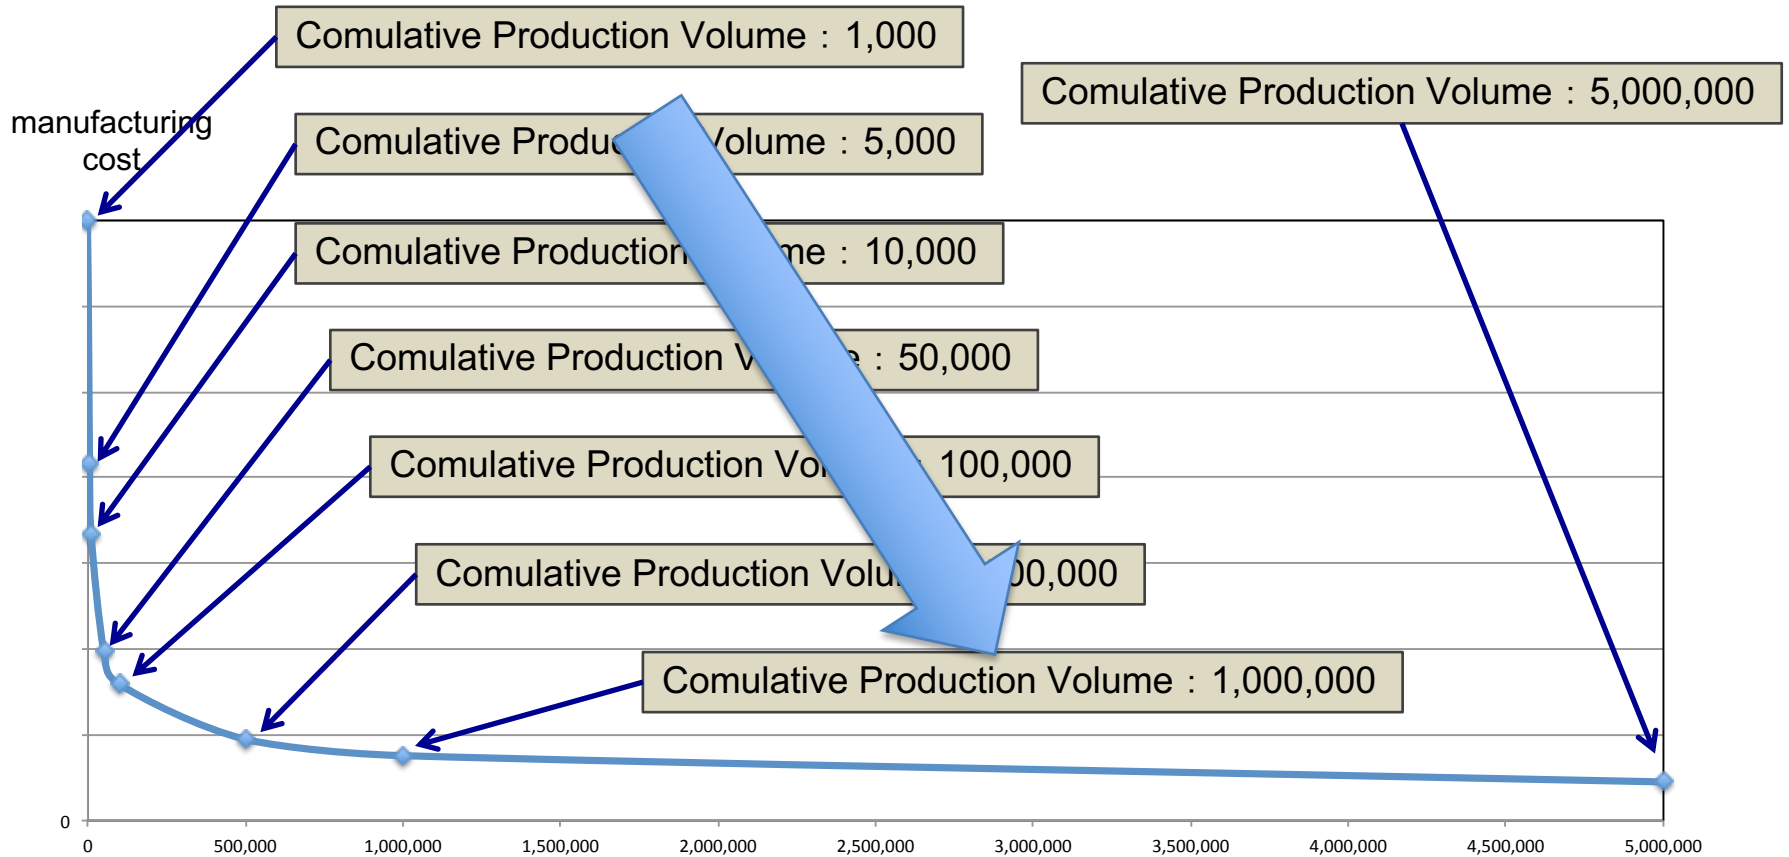

Lequio Power Technology's Mission

« Eradicate no healthcare service zone »

Medical equipment market

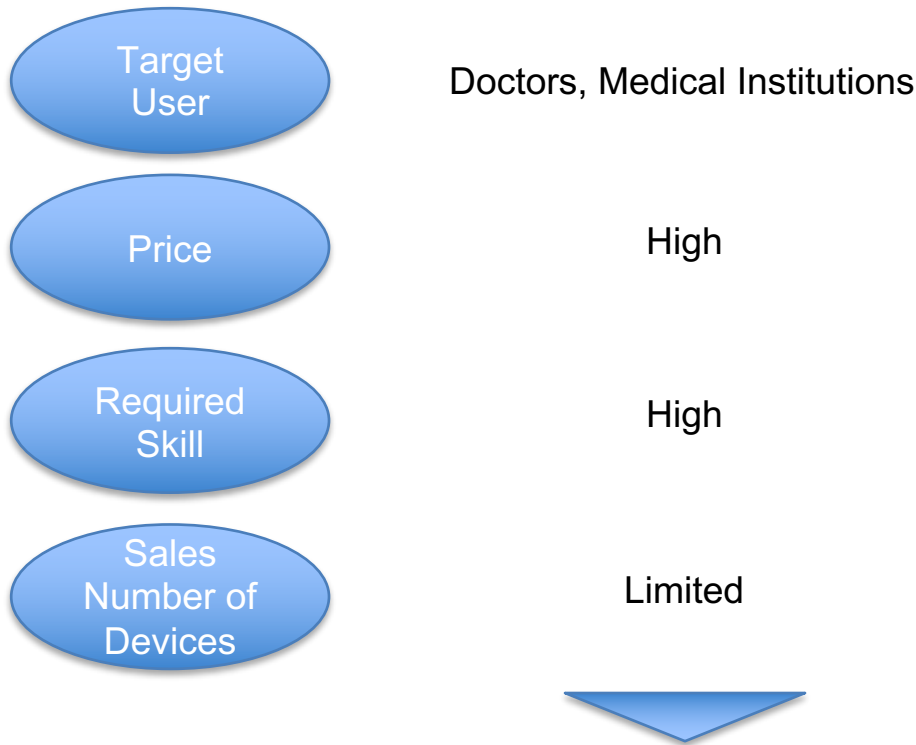

Thanks to the Experience Curve Effect,
1,000 times production volume realizes 1/10 sales price

Business model shift in medical device business

Conventional Medical Device Business

Device sales is the main source of profit. Medical system for wealthy people pays to keep this business.

Medical Device Business for Everyone

Multi-level, Multi-area
(Doctors, Co-medicals, midwives,
Medical Institutions, ... Consumer)

Low

Low (Study assist CLOUD is provided)

Huge

Source of profit is not set on the device sales, but on the huge access gather in the CLOUD. (Google like business model)

"SyncView" realizes smooth communication with ultrasound movie

All our products have SyncView mode

② With SyncView...

Easier to give advice

Image of SyncView mode

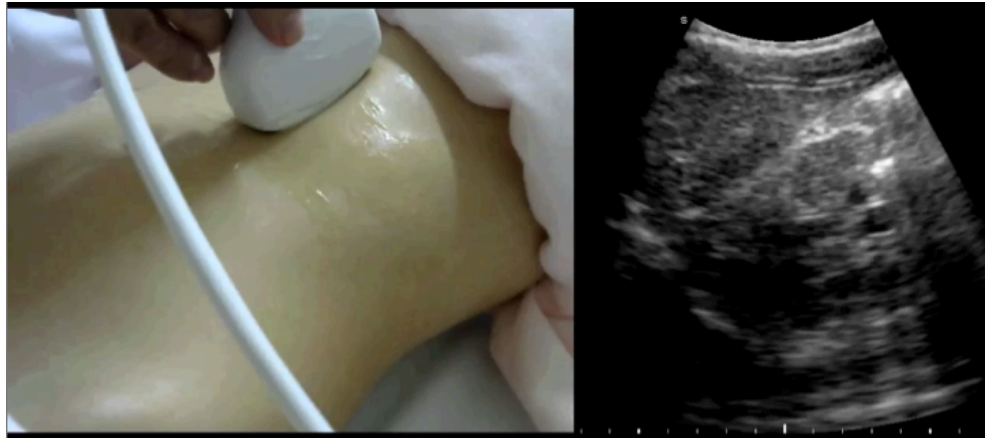

Image of the location of the probe

Echography image

① Only with the image and the film echography ...

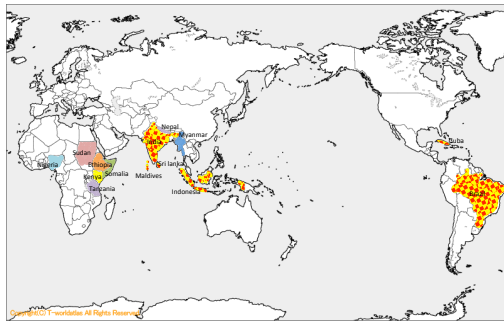

Difficult to give appropriate advice

③ SyncView makes remote communication between ultrasound users possible

Ultrasound Study Cloud Platform “PsCAM Net”

① Upload images and ask questions

③ Data to be used for the research on diseases all over the world

Data

Advice

② Highly qualified medical doctors give observations

Tetsu: I found abnormality in a liver of my patient.

Yasu: This seems an early stage of a liver cancer. Please find the primary tumor.

Tetsu: Thank you.

Let's realize a world without no healthcare service zone
