

SOLAR CHARGER

RC100-P8

Battery-free Innovative Solar Charger

1 Battery replacement not required

2 8 ports working simultaneously

3 Life cycle is over 10 years

Eco-friendly charger using solar power

We provide clean and safe power for non-electrified areas using 12V solar panel without need to worry about disposal of old battery

Maintenance-Free and Sustainable charger system

This innovative charger doesn't use lead or Lithium-ion battery. Battery replacement or any form of maintenance is not required.

Neither cellphone nor all electronics put burden on the charger unit.

Realize Hybrid charger for maximum efficiency

For day time it can be used without any Lead Battery only with a solar panel minimum 100Watt. It provides 8 USB ports for charging. Simultaneous charging is possible.

【CAUTIONS】

For the environment we don't recommend you to connect solar charger with lead batteries. If you want to charge in nighttime, you should charge power banks in day time and use it. If you connect the lead battery, only approved contractor can be allowed connect them.
